

## **INCINERATORS - WEAPONS OF MASS DESTRUCTION?**

by Dr. Dick van Steenis MBBS

Summary of paper at the RIBA Conference 31<sup>st</sup> Jan – 2<sup>nd</sup> Feb 2005  
Presented on 31 January 2005 - RIBA, London.

### **HISTORICAL AND THE TAXPAYER.**

1853 Dr. John Snow proves cholera from Broad St pump not "ODOURS" (used by EA 1996-)  
1920s & 1930s Rockefeller runs Standard Oil = Exxon (some capital from Rothchild Bank) and buys American Cancer Soc and invests in eugenics (cold Spring Harbour) & IG Farben etc. 1943 U.S. War Office told PM1s most lethal to man & effects through body  
1980-1989 Pollution studies of 550000 people (Dockery & Pope etc)  
1990-1996 Experiments on rats; dogs & humans prove PM2.5 critical size & pathology.  
1997 USEPA PM2.5 rule. Prosecutions 2000& 2001 (following Health Effects Inst report May 2000& Death Disease & Dirty Power report Oct 2000) of 10 power co, 6 oil co & steel co.  
Sept 2003 White House Report shows savings of \$193BN from PM2.5 cleanup relating to just hospital savings 7 and days off work savings, clearly mostly since 1997 rule, & 7 times investment cost.

Okopol report 1999 & USEPA both agree spend £1 save £6 NHS £4 Social costs.

Compare UK health probably best 1994 but downhill under Blair/Prescott with 2000 IPPC downgrading of BAT to anything will do, just maximise profit.

Councils to be charged later 2005 £150 /ton for landfill without quotas. Also unlimited imports of hazardous waste mixed as "fuel" plus imported current radioactive medium grade hazardous waste.

Much radioactive waste incinerated by 34 incin England/Wales eg Grondon, Colnbrook (1990-)

Industry largely controls UK. Committee members in pay of Glaxo etc Govt. lobbyist's rule roost. Wyeth/ ABPI control health and vaccine programs, Govt. mandates so drug co. freed of much litigation. Selenium etc. to be banned 2005. Govt & industry control Guys PU now Health Protection Agency, who advise public health drs. & PCTs. Their "knowledge" is at least 70 years out of date. Birth defect data and cancer registers have been fraudulently massaged down and real causes of death altered. So-called studies are often fraudulent by fiddling data, dates, areas or controls, and omitting key references. Govt. check and censor media & UK medical & scientific journals. Truth is hidden, only is spin allowed. Subsidy of BP /AMOCO Oil Co. set up FoE c.1973 to protect oil cartel etc. & to control action groups (3x£2000pa each) = £64200 of £8.1m income 2002. Patient "charities" are mostly controlled by drug co. donors and refuse to look at causes of the illness they use to collect money. Blair gave judges £1.5 million each pension fund (?for loyalty), Blair's pal Hodge runs Legal Aid, and Solicitors have been bribed to loose cases. NHS Whistle blowers have been sacked or suspended.

Result £46Bn spent on NHS 1996 risen to £87bn 2005 meaning £27bn above inflation with only 1.5% extra output meaning £26bn extra costs from pollution & "Tony's cronies" on top of previous £18bn ie £40bn minimal pollution cost of which 75% can be sorted readily so £30bn savings easily done including disbanding corrupt committees/quangos. Invalidity benefit is now paid to 3% of population in parts of West Berkshire & Northern Hampshire relatively less polluted compared with Merthyr Tydfil & 40% above Port Talbot as more polluted areas.

Particle average sizes emitted from burning coal are alkaline PM5, heavy oils acidic PM2, orimulsion & waste mixes PM1. Only smaller than PM3 enters lungs. 90% of PM1 retained in lungs. Hence UK Govt. only measures PM10 down to PM4 in monitors – totally irrelevant. At the new Grondon incinerators (Colnbrook) there will be no monitoring of PM2.5s, radioactivity or after first year dioxins. Power stations and oil refineries have unlimited emissions, cement works virtually the same and incinerators unlimited PM2.5 & PAHs at least. Even trains are burning very substandard fuels thanks to the Rail Regulator until 2011 without emission controls.

Only proper long-term study of health from incinerator was at St. Niklaas 2001 which was officially within EC directive but closed by judge in court due to deaths and illnesses. Av. 12 years was taken off lifespan. Cancer incidence rose 480% on top of Belgian national increase. Slough had SMR 88 in 1990. After 5 years of Grondon (plus it appears CHP Slough & ??previous clinical waste hosp. Incinerator) SMR rose to 122 equal to 11 years off lifespan by 1995 and SMR121 in 2001. This meant cull of population especially in 50's.

Health effects found as expected around chimney (2miles) & downwind (highest rate 7miles per 100ft chimney, total spread PM2.5s over 28miles per 100ft., PM1s can be blown as far as Russia causing dimming of sun. Further health damage has occurred within 3 mile radius of hazardous waste site where incinerator fly-ash is dumped. One example is by Bishops Cleeve (Cheltenham) where radioactive flyash is dumped from Colnbrook & Bolton plus hazardous flyash from 3 other incinerators without current liner with cancer of ovary in two 30-year olds & another SADS victim noted recently.

PM2.5s set up inflammation in lungs, are handled by macrophages & T-Lymphocytes. Excess or insoluble items walled off (fibrosis leading to COPD) soluble items travel by bloodstream. PAHs & heavy metals are amongst worst affecting heart & causing mutations of DNA.

### **TOTAL EFFECTS INCLUDE**

Birth defects----- terminations, live defects, miscarriages. See McMaster experiment 2004  
Premature deaths of babies, infants and adults.  
T-lymphocyte diversion/depletion causes SIDS, cot deaths, autism, MS, AIDS, GBS, Attention Deficit Disorder & Behaviour problems.  
Lower IQ & educational achievement eg 1 or 2 classes down, worse GCSE grades.  
Asthma, COPD, viral & other respiratory or other infections (85% younger boys)  
Coronary artery disease, heart attacks, arteriosclerosis, strokes, SADS  
Diabetes 2 (and sometimes diabetes 1 ) --- massive rise in the UK under Tony.  
Multiple chemical sensitivity with allergies and arthritis.  
ME ( gasses affect P450 & Y-lymphocyte diversion) and CFS  
Clinical depression. (9x rise Pembs), prison suicides), apathy,. Part of obesity problem.  
Hypothyroidism (part of the obesity problem under Tony)  
Endometeiosis & other hormones disrupted.  
Cancers----- leukaemias, nonhodgkins lymphoma, brain, breast, colon, lung, bladder, kidney, liver.  
For childhood cancers see the Knox report Jan 2005 and Perera et.al report July 2004.  
Cancer incidence has reached some 80% of deaths in Pembroke downwind of oil complex.

### **PROTECTION MEASURES.**

Campaign & pray for revival with return of morality.  
Take selected public health directors to GMC for breaches of duty & fraud.  
Move house to a less polluted zone.  
Install HEPA filter in home.  
Avoid pesticides and fluoridated water as much as possible as cocktail effects.  
Take added selenium, zinc, coenzyme Q10 and vitamins C & B6  
Public Health Directors have orders from the GMC to protect the public, know their subject, keep up to date, listen to patients and colleagues, and be prepared to justify every sentence of documents signed by them. The Public health director at Slough like many of his fellow directors are in breach of these rules, instead of signing warrant for unlawful killing.
